## Why PrepWorks Academy?

PrepWorks Academy engages students in interactive classrooms where all students have an equal opportunity to participate and share their ideas, growing confidence in their abilities. PrepWorks Academy strives to merge the UK Curriculum with technology, a hands-on approach and worksheets for better understanding and mastery of subjects taught.

We recognize that students work and think differently as 21st century learners who are digital natives. Our aim is to build a strong foundation for international secondary schools or universities abroad by developing crucial critical thinking and communication skills while discovering the fun side of learning that develops their thirst for knowledge.
